Walk the Plank .....	15
Cutting Edge Elements .....	16-17

#### **Sky Tykes®**

Sky Tykes® Elements .....	18-21
---------------------------	-------

### KEY

#### **BE** BARRIER ELEMENTS

Barrier elements are elements that have ropes or handlines across the midsection of the element providing protection from the participant going outside of the element borders. They are required at an element location which is next to an incline or any feature of the building that the participant could swing into or needs protection from for any reason.

#### **HL** HANDLINES REQUIRED

Elements that require a handline element above the main element to help the participant across.

#### **EC** EXISTING COURSE

An existing course may require engineering revisions to retrofit this element. An RCI engineer must determine if a new overhead or welded plates are necessary.

#### **TH** THEMED ELEMENT

Add your company logo, mascot or theme to any of these elements.

#### **\$** PRICE RATING

Each dollar sign denotes the overall price rating of an element. For example, an element labeled with a single dollar sign is one that is known to be less expensive while three dollar signs indicates an element considered to be one of the most expensive.

#### **DIFFICULTY RATING**

The overall difficulty of each element is depicted using gradually rising red bars. A lower number of bars, such as one, indicates the easiest elements while the max five bars refers to elements that are the most difficult.

PRICE RATING	ELEMENT PRICING
\$	\$250 - \$600
\$\$	\$750 - \$1,500
\$\$\$	\$1,500 - \$2,600
\$\$\$\$	\$3,500 - \$8,000

## ELEMENT ORDERING PROCESS

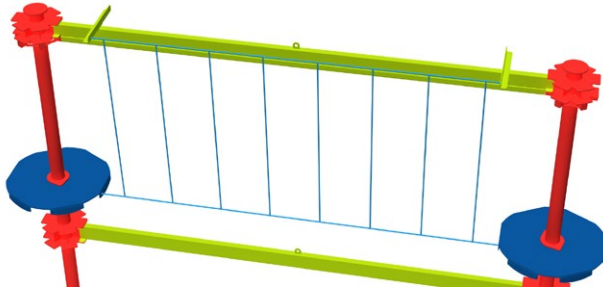

- Contact the aftermarket sales department to fulfill any product equipment needs. A staff person will confirm order was received and either proceed with the order or respond with clarifying questions.
- The order will be sent to the appropriate department to be filled. Orders are processed in the order they are received.
- Quotes can be provided at request. Lead times may vary depending on which department the order applies to.
- RCI fills the order and ships items back to client upon completion.
- The RCI accounting department will send the invoice for the order once the item ships. Invoice is due net 30 days from shipment.
